Back-of-House	Cortega™, Fissured™, Fine Fissured, Dune™	Low cost ceiling options for use when other performance features are not required; Use Fine Fissured and Dune for sag-resistance if HVAC may not be in constant operation.

REPLACE

HOW TO IDENTIFY THE RIGHT REPLACEMENT PANEL

1 Pattern – Visually match with the panels in your building

2 Suspension System (Grid) Type –

15/16" Grid Width

15/16" Prelude®
with Lay-in tile

15/16" Prelude
with Tegular tile

15/16" Prelude
with Vector® tile

15/16" Prelude
with Concealed tile

9/16" Grid Width

9/16" Suprafine®
with Tegular tile

9/16" Silhouette®
with Tegular tile

3 Edge detail –

Square Lay-in

Simple, least expensive option; square cut edge of panel lays on grid.

Tegular

Reveal edge gives the ceiling panel a 3-dimensional look.

Vector

Panel edges cover a portion of the grid leaving a 1/4" reveal in between panels. Panels are downward accessible.

Concealed

Slightly angled reveal panel edges with no visible grid.

4 Turn over a tile –

- Look for the item number or product name on the back of the panel
- Use the Armstrong Ceilings Crossover Reference to find:
 - product name
 - size of panel and grid
 - type of edge detail

5 Contact the experts –

- Download the Grainger® Replacement Ceilings App
- Take a close-up photo of the overall ceiling pattern and grid interface
- Send the photo to our technical team via the app or by email: techline@armstrongceilings.com
