

# METAL WORKS™

Torsion Spring  
Ceiling Panels

# So Many CHOICES

From a monolithic visual, to blades, to mesh, MetalWorks™ Torsion Spring ceiling panels are available in a variety of styles and finishes. Ease of installation and increased accessibility make them the perfect choice for any project.

For the wood enthusiast, we offer three families of standard wood-look finishes, including our own factory-cut downlight panels for easy lighting integration. Standard and custom color options mean the sky's the limit.

# UA Football Locker Room A LASTING IMPRESSION

## the challenge:

When designing the University of Alabama Football Locker Room at Bryant-Denny Stadium, the design team from Forty Nine Degrees wanted "to create a unique experience so that anyone walking through the space would know they were in the home of the Alabama Crimson Tide," explains Jesse Ranly, VP-Creative, Client Strategy at Forty Nine Degrees.

Situated at the end of the new team tunnel, where visitors are enveloped in audio-visual highlights of Alabama football history, the locker room is intended to be an extension of the sights and sounds of the tunnel.

## the solution:

The concept the Forty Nine Degrees design team developed called for a metal ceiling, perforated with the Alabama Script A logo and random trails of additional perforations. Diffused lighting from a series of LED light boxes behind the ceiling would accentuate the Script A logo and illuminate the space below.

To make the ceiling concept a reality, Forty Nine Degrees turned to the design professionals at Armstrong who realized the design intent with a custom perforated MetalWorks™ Torsion Spring Ceiling System.

While the original concept called for the perforations in all the ceiling panels to be unique, Armstrong found a way to reduce the cost by commonizing the perforation patterns in the panels that were not part of the Script A logo.

“Of the 194 panels that make up the ceiling, only 65 unique panels were required to make up the logo,” explains Armstrong Design Manager Dan Holdridge. “The rest of them are four different types of common panels. The perforation patterns in the common panels look random, but they aren’t.”

Concerned that the perforations would not allow enough light to penetrate the space, Forty Nine Degrees considered adding auxiliary light fixtures to the ceiling. “That would have really detracted from the design,” explains Holdridge. “So, we played around with the perforations in the logo to open them up a bit and let more light into the room.”

To demonstrate how much light output the larger perforations would provide, Armstrong created virtual mockups that simulated how bright the room would be with the design. “That really helped them to see how much light they would actually get and that it would be enough to light the space,” says Holdridge.

Pleased with the result, Ranly says the ceiling is a “show stopper” and credited the Armstrong team with making it possible. “Armstrong helped us transform our vision into reality,” he says. “Its team of specialists provided solutions that made our concept achievable both in design and function.”

## PHYSICAL DATA

**Material**  
All panels, except 7226: Aluminum – 0.040"  
7226: Aluminum - 0.063"

**Surface Finish**  
Painted: Factory-applied polyester paint  
Effects: Powder-coated, dye-sublimation, post-production  
Sequels: Pre-coated  
Natural Reflections: PVC-free laminates  
Custom colors and finishes available.  
Custom Sequels finishes are available for orders 10,000 SF or larger.

**Fire Performance**  
Painted, Effects, Natural Reflections and Sequels finishes:  
Class A: ASTM E84. Flame Spread Index 25 or less. Smoke Developed Index 50 or less.  
Natural Reflections Finishes: CAN/ULC S102: Flame Spread Rating 30. Smoke Developed Classification 30.  
Painted aluminum finishes: CAN/ULC S102: Flame Spread Rating 25 or less. Smoke Developed Classification 50 or less.

**ASTM E1264 Classification**  
Painted, Effects, Natural Reflections and Sequels finishes:  
Unperforated: ASTM E1264 Type XX Pattern G Fire Class A  
Perforated - ASTM E1264 Type XX Pattern C Fire Class A

**Acoustical Options**  
Perforated panels are supplied with a black fiberglass fleece to absorb sound.

**Recycled Content**  
Up to 16%.

**Design Considerations**  
Anodized, Lacquer Mill and pre-coat finishes may vary in shade between production runs as well as over time. Sizes can be mixed and matched on non-perforated panels only.  
30" x 30" panels have a directional finish that is perpendicular to the main beams; all other panel sizes have a directional finish that is parallel to the main beams.  
MetalWorks steel and aluminum panels are made at different manufacturing facilities that use different paint systems. Because of this, similar colors, i.e., White and Whitelume, are not exact color matches. Please consider this when designing adjacent spaces with multiple MetalWorks products.  
On pre-coated finishes, clarity of image is best on flat surfaces. Pattern repeat may occur. Product is dye-lotted. Due to potential color variation, be certain to order sufficient initial quantities and attic stock.

**Wind Uplift Performance**  
24" x 24" and 24" x 48" panels noted for exterior flat applications tested for wind uplift Classes 30, 60, and 90. Specific installation instructions to meet these classes are available.

**Design Support**  
Project management assistance is available by calling TechLine customer support at 1 877 276-7876.

**Seismic Restraint**  
MetalWorks Torsion Spring panels have been engineered, tested, and approved for application in all seismic areas when installed per Armstrong Ceilings installation instructions.

**Cleaning and Disinfecting**  
Cleaning and CDC approved disinfecting options available on [armstrongceilings.com/cleaning](http://armstrongceilings.com/cleaning)

**FAST134 Program Considerations**  
Size of Job Matters: Big jobs, over 2500 SF or 50 pieces for shapes/vertical elements will have longer lead times.  
Location Matters: Transit time not included. We are ready to ship in one week on FAST1 items. However, transit to the states west of Wyoming may add time.  
Distributor Truck Schedule Matters: We rely on distribution to help move products around the country. When speed matters, work with your local distributor to ensure FAST134 service.  
Stock vs Made-to-Order Matters: FAST3 & FAST4 items are made-to-order and will ship direct to distributor. FAST1 (stocked items) will go through distribution and depend on distributor truck schedules.

**Warranty**  
One (1) year limited warranty.  
Details at [armstrongceilings.com/warranty](http://armstrongceilings.com/warranty)

**Weight**  
0.69 lbs/SF  
0.86 lbs/SF (Item 7226)

▲ MetalWorks Mesh Torsion Spring 24" x 48", 1Cell woven panels in Silver Grey; FeltWorks® wall panels in Light Grey, Dark Grey, and Beige

MetalWorks™ Mesh Torsion Spring panels offer an industrial look with minimized grid visibility and 100% swing-down accessibility.

## KEY SELECTION ATTRIBUTES

- new** Popular Torsion Spring installation method now standard in 24" x 24" and 24" x 48" woven mesh
- Slotted grid Torsion Spring installation minimizes grid visibility by hiding the grid above the panel face
- Woven patterns offer over 75% open area, enabling sprinklers to be installed above the panel face, minimizing disruption of the ceiling plan with MEP
- CleanAssure™ family of products – includes disinfectable panels, suspension systems, and trim
- Black acoustical infill panels provide high sound absorption and help conceal elements in the plenum
- For custom options contact [ASQuote@armstrongceilings.com](mailto:ASQuote@armstrongceilings.com)

## MESH FINISHES Due to printing limitations, shade may vary from actual product.

### Powder Coated

## COORDINATING SUSPENSION SYSTEM COLORS

Black (BL3)  
360° Painted

Mesh patterns leave suspension system visible.  
Black 360° grid is recommended for blending with grid and plenum.

NOTE: Axiom® Classic Trim is recommended for cloud configurations.

## PHYSICAL DATA

### Material

Cold-rolled steel.

### Surface Finish

All panels are available in a range of standard and custom, factory-applied, powder-coated finishes.

### Fire Performance

Class A: ASTM E84 and CAN/ULC S102. Flame Spread Index 25 or less. Smoke Developed Index 50 or less.

All MetalWorks Mesh panels are non-combustible.

As with other architectural features located at the ceiling, Mesh panels may obstruct or skew the planned fire sprinkler water distribution pattern, or possibly delay or accelerate the activation of the sprinkler or fire detection systems by channeling the heat from a fire either toward or away from the device.

Designers and installers are advised to consult a fire protection engineer, NFPA 13, and local codes for guidance where automatic fire detection and suppression systems are present.

### Acoustics Considerations

NRC-tested using infill panels. Painted panels may experience a slight reduction in NRC due to color painting processes.

### Design Considerations

Panels align best when installed next to panels of the same size. Reveal between panels can vary.

Black 360° grid minimizes grid visibility. Axiom trim colors coordinate but are not an exact match.

Minimal deflection is expected as panels increase in size. It is possible to see up to 1/2" deflection.

### Installation Considerations

For custom design assistance contact [ASQuote@armstrongceilings.com](mailto:ASQuote@armstrongceilings.com)

Use caution and wear appropriate hand and eye protection when installing or cutting these metal panels. Refer to Installation Instructions BPLA-293095 at [armstrongceilings.com/metalworks](http://armstrongceilings.com/metalworks) for details and cutting recommendations.

### Cleaning and Disinfecting

Cleaning and CDC-approved disinfecting options available on [armstrongceilings.com/cleaning](http://armstrongceilings.com/cleaning)

### Warranty

Details at [armstrongceilings.com/warranty](http://armstrongceilings.com/warranty)

### Weight/Panel (Bulk Packed)

A panelized torsion spring metal ceiling system in a variety of blade configurations, achieving an accessible, open reveal linear look installed up to twice as fast as individual blade systems.

**KEY SELECTION ATTRIBUTES**

- 20 standard 24" x 96" panels with multiple blades in varying heights, widths, and spacing configurations
- 1" and 2" wide blades with 4", 6", and 8" heights
- 24" x 96" torsion spring panels install up to twice as fast as individual blade systems
- Durable, downward accessible system - quickly open a large area with full panel removal
- Mix and match standard panels with alternating blade heights or widths for a custom look
- Smart design – reveals between blades are equidistant panel-to-panel; Panels have a consistent 1/8" reveal end-to-end
- MetalWorks™ Immix™ panels are part of the Sustain™ portfolio, and meet the most stringent industry sustainability compliance standards today
- CleanAssure™ family of products – includes disinfectable planks, suspension systems, and trim
- 11 panels with 70% or more open area to minimize sprinkler install and material cost, achieving a less cluttered finished ceiling with an open aesthetic
- Select products included in the FAST134 program – ready to ship in 4 weeks or less
- Panels can be field cut; perimeter cut kit and additional end caps are available for a clean, professional finish
- Black acoustical infill panels hide the plenum and achieve up to 0.95 NRC
- Get total noise control and design flexibility with Total Acoustics™ ceiling panels: NRC + CAC = Total Acoustics
- Aluminum blades with exceptional durability – washable, scrubable, soil-resistant

**COLORS** Due to printing limitations, shade may vary from actual product.

**PHYSICAL DATA**

**Material**  
Aluminum – thickness 0.032"

**Surface Finish**  
Painted: Factory-applied polyester paint. Custom colors also available. Contact ASQuote@armstrongceilings.com for custom finish requests.

**Fire Performance**  
Class A: Tested per ASTM E84. Flame Spread Index 25 or less. Smoke Developed Index 50 or less. CAN/ULC S102 surface burning characteristics. Flame Spread Rating 25 or less. Smoke Developed Classification 50 or less.

**Acoustical Options**  
Perforated panels are supplied with a black fiberglass fleece to absorb sound.

**Design Support**  
For custom design assistance contact ProjectWorks® Design Services or visit armstrongceilings.com/projectworks

**Design Considerations**  
When installed, panels hang either 5-3/16", 7-3/16" or 9-3/16" below the face of the grid, depending on the height of the blade. MetalWorks™ Immix™ Blades panels can be cut in the field, see installation instructions for details.  
Variation in reveal between panel ends up to 1/16" may occur  
Black 360® grid minimizes grid visibility. Axiom trim colors coordinate but are not an exact match.  
For optimum visual design, backlighting panels is not recommended. For lighting integration see installation instructions.

**Installation Considerations**  
Although panels are installed from below and never travel into the plenum, MetalWorks Immix Blades panels will require a minimum 5" clearance above the suspension system. This allows enough room for the springs to travel into the plenum space during installation or removal.

**Seismic Restraint**  
MetalWorks Immix panels are approved for application in all seismic areas when installed per the seismic guidelines in the Armstrong Ceilings installation instructions.

**FAST134 Program Considerations**  
Size of Job Matters: Big jobs, over 2500 SF or 50 pieces for shapes/vertical elements will have longer lead times.  
Location Matters: Transit time not included. We are ready to ship in 1 week on FAST1 items. However, transit to the states west of Wyoming may add time.  
Distributor Truck Schedule Matters: We rely on distribution to help move products around the country. When speed matters, work with your local distributor to ensure FAST134 service.  
Stock vs. Made-to-order Matters: FAST3 & FAST4 items are made-to-order and will ship direct to distributor. FAST1 (stocked items) will go through distribution and depend on distributor truck schedules.

♦ When specifying or ordering, include the appropriate 3-letter color suffix (e.g., 5459A61M1 M Y A).

**PHYSICAL DATA**

**Material**  
Aluminum – thickness 0.032"

**Surface Finish**  
Painted: Factory-applied polyester paint. Custom colors also available. Contact ASQuote@armstrongceilings.com for custom finish requests.

**Fire Performance**  
Class A: Tested per ASTM E84. Flame Spread Index 25 or less. Smoke Developed Index 50 or less. CAN/ULC S102 surface burning characteristics. Flame Spread Rating 25 or less. Smoke Developed Classification 50 or less.

**Acoustical Options**  
Perforated panels are supplied with a black fiberglass fleece to absorb sound.

**Design Support**  
For custom design assistance contact ProjectWorks® Design Services or visit armstrongceilings.com/projectworks

**Design Considerations**  
When installed, panels hang either 2-3/16", 3-3/16", 5-3/16", 7-3/16" or 9-3/16" below the face of the grid, depending on the height of the plank. MetalWorks™ Immix™ Linear panels can be cut in the field, see installation instructions for details.  
Variation in reveal between panel ends up to 1/16" may occur.  
Black 360° grid minimizes grid visibility. Axiom trim colors coordinate but are not an exact match.  
For optimum visual design, backlighting panels is not recommended. For lighting integration see installation instructions.

**Installation Considerations**  
Although panels are installed from below and never travel into the plenum, MetalWorks Immix Linear panels will require a minimum 5" clearance above the suspension system. This allows enough room for the springs to travel into the plenum space during installation or removal.

**Seismic Restraint**  
MetalWorks Immix panels are approved for application in all seismic areas when installed per the seismic guidelines in the Armstrong Ceilings installation instructions.

**Cleaning and Disinfecting**  
Cleaning and CDC-approved disinfecting options available on armstrongceilings.com/cleaning

**Warranty**  
Details at armstrongceilings.com/warranty

**FAST134 Program Considerations**  
Size of Job Matters: Big jobs, over 2500 SF or 50 pieces for shapes/vertical elements will have longer lead times.  
Location Matters: Transit time not included. We are ready to ship in 1 week on FAST1 items. However, transit to the states west of Wyoming may add time.  
Distributor Truck Schedule Matters: We rely on distribution to help move products around the country. When speed matters, work with your local distributor to ensure FAST134 service.  
Stock vs. Made-to-Order Matters: FAST3 & FAST4 items are made-to-order and will ship direct to distributor. FAST1 (stocked items) will go through distribution and depend on distributor truck schedules.

**Weight**
