Reach New Heights
of Sustainability

SUSTAIN®

High Performance
Sustainable
Ceiling Systems

No matter what sustainability or design challenges you face, Armstrong® Sustain® portfolio makes your decisions simpler by offering the largest forward-thinking portfolio of healthy ceiling and wall solutions with verified material transparency, and low-embodied carbon*.

In an industry where meeting evolving sustainability goals can be an increasingly complex equation, Sustain strives to make your decisions simple.

* Embodied carbon reduction based on EC3 baseline for ceilings. The EC3 tool is managed by and available through [Building Transparency](#).

Cut Carbon

Leading-edge solutions that reduce carbon across a product's entire lifecycle:

- Broadest portfolio of low-embodied carbon solutions
- By focusing on embodied carbon, we can deliver solutions to minimize the overall project's impact
- Deeply committed to its own sustainability goals, Armstrong is constantly working to innovate and add new solutions

Minimize overall project environmental impact by selecting leading-edge solutions from the broadest portfolio of low-embodied carbon ceiling and wall products that provide carbon reductions across a product's entire lifecycle.

The Sustain® portfolio makes selecting ceiling and wall solutions that meet sustainability criteria easier and less time consuming at scale. You'll find solutions for every design goal, with easy-to-specify products that clearly communicate transparency and optimize information.

WoodWorks® Grille Tegular 24" x 48" panels in Golden Maple finish; USAI® Micro™ downlights

Decisions Simplified

Reduce Waste

Since 1999, the nation's first ceilings recycling program has diverted over 200 million square feet of old ceiling materials from going to landfills. The Armstrong Ceilings Recycling Program provides an efficient solution to reduce construction waste and embodied carbon on commercial renovation projects.

The program helps meet waste-reduction targets, and we provide a diversion savings calculator to directly measure the resulting environmental impact and savings.
