 = Items with Total Acoustics® performance

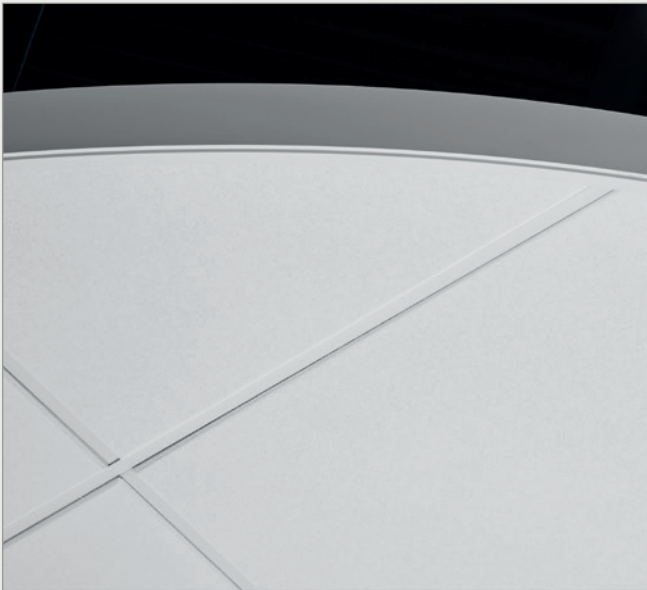

Programs & Services Used

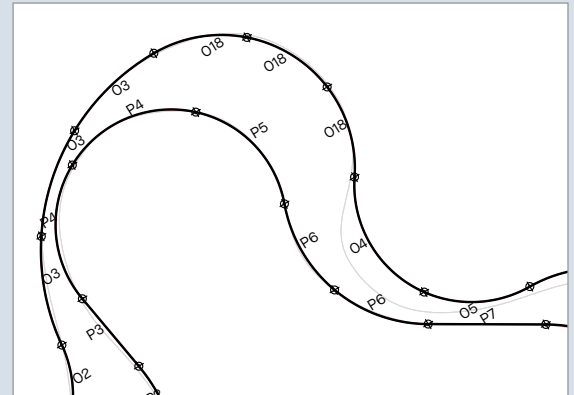

To help ensure feasibility of the architect's design intent and add construction efficiency, ProjectWorks® provided detailed drawings for the project's 4,000 linear feet of Axiom® based on realistic manufacturing capabilities. Further, since the Axiom was prefabricated, ProjectWorks helped optimize the layout's splice locations and the manufacturing trim schedule to yield the least amount of scrap possible. The pre-cut Axiom was shipped to the jobsite, generating no additional waste during construction, resulting in a sustainable enhanced visual.

Crisp Edge Detailing with Axiom® Trim

Factory-precision mitering in custom lengths – both straight and curved – allows for smooth, clean finishes.

Close-up image of the Axiom layout provided by ProjectWorks, showing exact location of each segment of trim throughout the project space.
