Sustain® portfolio

## Programs & Services Used

To create a unique lobby, the architect chose a MetalWorks™ Torsion Spring Shapes ceiling system. ProjectWorks® helped the architect design the space using standard 2D and faceted 3D geometric shapes and perimeter panels. The panels were backed with an acoustical fleece to provide an NRC of 0.70. Four flat areas were also incorporated to integrate canned light fixtures. ProjectWorks provided a complete drawing package with detailed panel, suspension, and hub layouts that ensured the architect's concept was installed efficiently.
