Armstrong FrameAll™ Drywall Grid Cross Tees Now Available with Knurled Ridges

*New feature improves screw grab and reduces screw spin-out during
board installation*

LANCASTER, Pa. – Armstrong® Ceiling & Wall Solutions has announced that its FrameAll™ drywall grid cross tees are now available with knurled ridges along the length of the cross tee. The new feature improves screw grab and reduces screw spin-out during board installation.

In addition to improved handling, knurled ridges also stiffen the tees. When screwing tee to tee, there is no need to C-clamp the tees together for a clean screw grab through both tees. The ridges facilitate easy screw installation through both tees.

[FrameAll](#) drywall cross tees with knurled ridges feature the Armstrong® ScrewStop™ reverse hem that prevents screw spin off on a 1-1/2" wide face. Combined with the Armstrong® XL® stab-in end detail that provides a secure locked connection and the Armstrong® PeakForm® profile that increases strength and stability, FrameAll cross tees with knurled ridges provide a performance advantage enabling contractors to work faster and easier.

All FrameAll products carry a “Made in the USA” label indicating at least 95 percent of the material is sourced and manufactured in the states.

FrameAll drywall grid cross tees with knurled ridges are also part of the Armstrong® Sustain® portfolio and meet the highest sustainability compliance standards in the industry today.

For more information about the FrameAll drywall grid cross tees with knurled ridges, visit www.armstrongceilings.com/frameallgrid. If help is needed, reach an Armstrong TechLine expert at armstrongceilings.com/techline.
