FELTWORKS®

Blades - HookOn
Design Guide

Armstrong®
CEILING SOLUTIONS

DEFINE
the Personality of Your Space

With FeltWorks® Blades - HookOn Panels, you can keep it understated with subtle color and soothing movement, or add drama with organized pops of color, shape, and direction with ready-to-install kitted modules and rectangular blades. Transform mundane to modern with a soft visual texture that quiets interiors.

- Reduce noise and define spaces
- High sound absorption – 0.85 NRC (E-400 Mounting)
- Easy installation with aluminum suspension bar and aircraft cables
- Part of the Sustain® portfolio; meets the most stringent industry sustainability standards today
- 15 standard colors
- No need to field-finish cut edges with color throughout panels

8" blade spacing

Soft Visual Texture

▲ FeltWorks® Blades - HookOn Peaks & Valleys with 8" blade spacing

QUIET
IN A KIT

FeltWorks® Blades - HookOn Panels quiet spaces and redefine the visual plane, changing the topography of the ceiling while adding warmth to spaces.

Two modular kit options give you flexibility to enhance your design visual and bring down the noise.

Peruse the following pages and see how easy it is to combine standard kits, or reverse blade direction to create unique looks.

Then go to armstrongceilings.com/feltworksblades to download detailed layout drawings. There you'll find specific information including blade numbers and pattern repeats so you can scale designs for use in any size space.

For ease of assembly, kitted modules will have a two digit identification number on the left-most hook on front of the blade.

FFor alternative colors anddesigns tailored to your projects, visit turf.design

FeltWorks® Blades – HookOn quiet spaces and redefine the visual plane, while adding warmth to interior spaces with 10 kitted options!

KEY SELECTION ATTRIBUTES

- Soft visual, more quieting acoustics
- Sustainable Beyond Standard: Custom sizes and all standard panels are part of the Sustain® portfolio and meet the most stringent industry sustainability compliance standards today
- Installs with Aluminum Suspension Bar and aircraft cables for a premium installed visual
- CleanAssure™ family of products – includes disinfectable panels, suspension systems, and trim
- Select products included in the FAST134 program – ready to ship in 4 weeks or less
- Made from up to 60% post-consumer recycled PET fibers
- Easy to specify and order kits with short lead times
- No need to field-finish cut edges with color throughout panels
- Easy plenum access – just lift off panels
- Sound absorption up to 0.70 (Sabins/SF)
- 3/8" thick blades provide a sleek linear visual – 3 standard profiles and a variety of blade heights offer dramatic visuals

STANDARD COLORS

Due to printing limitations, shade may vary from actual product.

Cotton (FCN)	Whisper (FWR)	Flannel (FFL)	Smoke (FSE)	Shadow (FSW)	Midnight (FMN)	Wheat (FWT)	Mocha (FMC)
Celestial (FCL)	Elderberry (FEB)	Iris (FIS)	Highland (FHL)	Buttercup (FBC)	Tangerine (FTE)	Apple (FAP)

PHYSICAL DATA

Material
3/8" thick non-woven layered and formed polyester felt (PET) fiber panels with color throughout.

Fire Performance
Flame Spread Index 25 or less. Smoke Developed Index 450 or less. Class A per ASTM E84.

CAN/ULC S102.2 surface burning characteristics. Flame Spread Rating of 75. Smoke Developed Classification of 105.

FeltWorks® Blades – HookOn, as with other architectural features located in the ceiling plane, may obstruct or skew the existing or planned fire sprinkler water distribution pattern, or possibly delay the activation of the fire sprinkler or fire detection system. Consult a fire protection engineer, NFPA 13, and local codes for guidance on the proper installation techniques where fire detection or suppression systems are present.

Application Considerations
Panel color and texture may vary from order to order; adequate attic stock should be ordered. Due to the nature of recycled materials, small dark fibers may be visible on light panels.

FeltWorks Blades – HookOn panels are not approved for exterior application.

FeltWorks Blades – HookOn panels should not be installed near sources of heat greater than 158° F.

Design Support
For custom design assistance contact ProjectWorks® Design Services or visit armstrongceilings.com/projectworks

Acoustical Performance
Tested per ASTM C423 and mounted in accordance with ASTM E795. Sound absorption of up to 0.70 Sabins/SF. Spacing of blades will impact acoustical performance. Contact TechLine for details at techline@armstrongceilings.com

VOC Emissions
GREENGUARD Gold Certified
Third-party certified compliant with California Department of Public Health CDPH/EHLB/ Standard Method Version 1.2, 2017. This standard is the guideline for low emissions in LEED®, WELL Building Standard™, Living Building Challenge® (LBC), CalGreen Title 24, ANSI/ASHRAE/ USGBC/IES Standard 189; ANSI/GBI Green Building Assessment Protocol.

PRODUCT CERTIFIED FOR LOW CHEMICAL EMISSIONS UL.COM/GG UL 2818

GREENGUARD GOLD

Installation Considerations
Any fixtures adjacent to FeltWorks Blades – HookOn panels must be independently supported. Adjacent panel ends are spaced 1/4" apart using standard suspension bar.

Seismic Restraint
FeltWorks Blades – HookOn panels have been engineered, tested, and approved for use in all seismic areas. OSHPD/DSA installations may require additional attachment from panel to suspension bar. See installation instructions for details.

Cleaning and Disinfecting
Cleaning and CDC approved disinfecting options available on armstrongceilings.com/cleaning

FAST134 Program Considerations
Size of Job Matters: Big jobs, over 2500 SF or 50 pieces for shapes/vertical elements will have longer lead times.

Location Matters: Transit time not included. We are ready to ship in 1 week on FAST1 items. However, transit to the states west of Wyoming may add time.

Distributor Truck Schedule Matters: We rely on distribution to help move products around the country. When speed matters, work with your local distributor to ensure FAST134 service.

Stock vs Made-to-Order Matters: FAST3 & FAST4 items are made-to-order and will ship direct to distributor. FAST1 (stocked items) will go through distribution and depend on distributor truck schedules.
